ADVANCED MULTIMEDIA PROCESSOR SOC SOLUTION

1. GENERAL DESCRIPTION

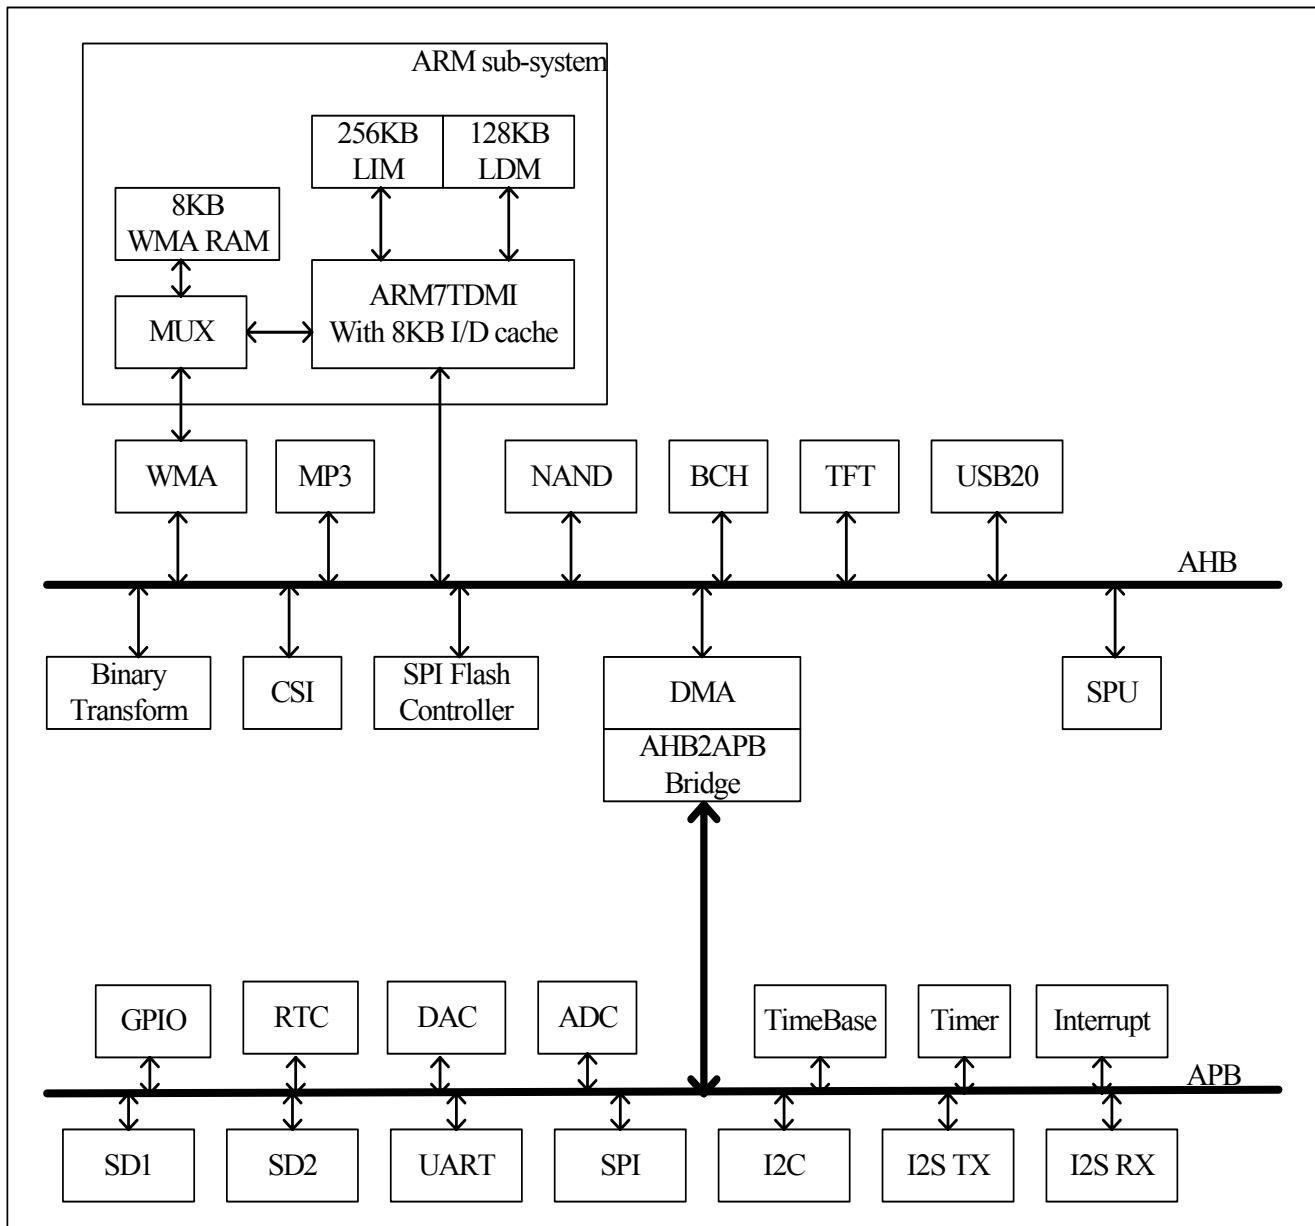

The Generalplus GP31P1003A, a highly integrated SoC (System-On a Chip), offers a great cost-effective and high performance ratio solution for multimedia applications. It is embedded the ARM7TDMI with 8K-byte unified ID-cache and many tremendous features, SPI Flash controller which CPU can run program directly on it, WMA accelerator, TFT-LCD interface, CMOS sensor interface, 60-bit BCH and Randomizer for MLC/TLC NAND Flash, UART interface which support smart card interface(ISO7816), 4-channel DMA controller, 6-channel 16-bit timers, RTC, 2 SD/MMC card interface, USB 2.0 mini-host/device, interrupt controller, SPI (master/slave) controller, 8 channel sound processing unit (SPU), programmable I/O ports, stereo 16-bit DAC for audio playback, 0.5W class AB mono audio amplifier, 8-channel 12-bit ADC, MIC, PLL, I2S TX/RX for external sigma-delta CODEC, 32K-byte OTP with EV mode, power control macro and 136K-byte embedded SRAM when WMA is disable.

With a complete set of common system peripherals, the GP31P1003A chip minimizes overall system cost and no additional component needs to be added. Not only does GP31P1003A feature the high-speed performance, but it is also a cost-effective system and the most importantly - compatible with all ARM based programs.

2. FEATURES

- ARM7TDMI CPU with 8KB unified ID-cache, embedded JTAG ICE, and working frequency up to 96MHz.
- Up to 136KB SRAM for local data buffer when WMA is disable. There is a dedicated 128KB internal SRAM if WMA is enable.
- 32KB OTP with EV mode
- SPI Flash controller which CPU can run program directly on it. Supports 1-bit/2-bit/4-bit IO mode both on STR and DTR. 2 SPI Flash are allowed in serial or parallel manner.
- WMA accelerator
- Four-channel DMA controller.
- TFT-LCD controller.
 - UPS051. (serial RGB)
 - UPS052. (serial RGB dummy)
 - I80 (8-bit system bus) I/F type.
 - CCIR601/CCIR656.
- Interrupt Controller.
- Universal Serial Bus (USB) 2.0 high/full speed compliance device and USB mini-host with built-in transceiver. Support Bulk IN/OUT, Audio ISO IN/OUT, Video ISO IN and Interrupt IN transactions.
- BCH 60-bit/1K and Randomizer for MLC/TLC NAND Flash
- 8 channel sound processing unit (SPU). Each channel in this SPU can do ADPCM/PCM decode, volume multiply and left/right channel mute control.
- Watchdog timer.
- Six 16-bit timers/counters.
- 2 SD/SDHC/SDIO/MMC card interface.
- SPI (master/slave) interface with data rate up to 24Mbps.
- UART (asynchronous serial I/O) interface with baud rate up to 1.8432Mbps and 115.2Kbps. The UART interface can be configured as smart card interface(ISO7816)
- 60 Programmable general I/O ports (GPIO) with pull-high/low control.
- Built-in Power macro for power on/off controller and a 4.2V to 3.3V LDO and a 3.3V to 1.2V LDO.
- Dedicated 4.2V to 3.3V LDO for ADC/DAC.
- Real-time clock (RTC) with independent power supply.
- 216MHz PLL, range from 24MHz to 216MHz with 6MHz step
- 16-bit stereo DAC (2-channel) for audio playback.
- 0.5W class AB mono audio amplifier
- 12-bit ADC with 6 line-in channels and 2 internal channels for battery and 1.2V measurement.
- MIC with PGA. (Programmable Gain Amplifier)
- I2S TX/RX for external sigma-delta CODEC

4. DISCLAIMER

The information appearing in this publication is believed to be accurate.

Integrated circuits sold by Generalplus Technology are covered by the warranty and patent indemnification provisions stipulated in the terms of sale only. GENERALPLUS makes no warranty, express, statutory implied or by description regarding the information in this publication or regarding the freedom of the described chip(s) from patent infringement. FURTHERMORE, GENERALPLUS MAKES NO WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE. GENERALPLUS reserves the right to halt production or alter the specifications and prices at any time without notice. Accordingly, the reader is cautioned to verify that the data sheets and other information in this publication are current before placing orders. Products described herein are intended for use in normal commercial applications. Applications involving unusual environmental or reliability requirements, e.g. military equipment or medical life support equipment, are specifically not recommended without additional processing by GENERALPLUS for such applications. Please note that application circuits illustrated in this document are for reference purposes only.
